STATUS PUBLIC ISSUE

GUIDE / VERIFY: General information about preventive care, **not medical advice.** Screening ages and intervals below are for adults at average risk; your family history, health and past results can change what's right for you. **Your health-care provider decides with you.**

1. REGULAR VISITS

VISIT	HOW OFTEN (TYPICAL)	NOTES
Primary care checkup	Ask your provider: often yearly	Bring your medication list and questions. *(DC-04)*
Dental cleaning and exam	Usually every 6 to 12 months	As your dentist recommends.
Eye exam	Every 1 to 2 years if you wear glasses or have diabetes; ask otherwise	Glaucoma risk rises with age.
Hearing check	Ask, especially after 50	Hearing loss is common and treatable.
Skin check	Ask your provider	Watch for moles that change in size, shape or color.

2. SCREENINGS TO ASK ABOUT

Based on U.S. Preventive Services Task Force recommendations for adults at average risk, as of November 2026.

SCREENING	WHO	NOTES
Blood pressure	All adults 18 and older	Yearly from age 40 or with higher risk; every 3 to 5 years for younger adults with normal readings.
Prediabetes / type 2 diabetes	Adults 35 to 70 who are overweight	A simple blood test.
Cholesterol / heart risk	Adults 40 to 75	Your provider estimates heart-disease risk.
Colorectal cancer	Adults 45 to 75	Several test options (stool tests, colonoscopy). Ask which fits you.
Breast cancer	Women 40 to 74	Mammogram every 2 years.
Cervical cancer	Women 21 to 65	Pap and/or HPV testing at the interval your provider recommends.
Lung cancer	Adults 50 to 80 with a heavy smoking history	Yearly low-dose CT, for current smokers and those who quit within 15 years.
Osteoporosis	Women 65 and older; younger women at higher risk	Bone density scan.
Depression and anxiety	Adults	Short questionnaires at routine visits.
Other	Ask about hepatitis C, HIV, abdominal aortic aneurysm (men 65 to 75 who ever smoked), and anything your family history suggests.	

3. VACCINES

Ask your provider or pharmacist at each visit which vaccines are recommended for you. Common ones for adults include a **yearly flu vaccine** and a **tetanus booster (Td or Tdap) every 10 years**, plus others depending on your age, health, pregnancy, job and travel. Keep a record (below), and add it to the Important Documents file. *(DC-05)*

4. BEFORE AN APPOINTMENT

- ☐ Write down your top 3 questions or concerns.
- ☐ Bring all medicines and supplements, or a current list. *(DC-04)*
- ☐ Note changes since your last visit: symptoms, other doctors, hospital stays.
- ☐ Know your family history (parents, brothers, sisters).
- ☐ Bring insurance card and ID.
- ☐ Ask: "What should I do before my next visit?"
