EMERGENCY TOOLS

HOME EMERGENCY KIT

A basic worksheet for preparing your home and family before an emergency.

THE STATIC STORAGE RULE

Unlike a rapid mobilization bag, your home emergency kit is designed for long-term shelter-in-place survival. Store these supplies together in a dedicated, cool, dry location that all household members can access in pitch darkness. Do not raid this inventory for daily household use.

1. CORE LIFELINE CACHES

SECTOR CHECK	CRITICAL SECTOR HARDWARE CACHE	OPERATIONAL TARGET & STRATEGY
[ ] WATER	Stored drinking water, food-grade drums, robust treatment chemicals, siphon hand pump.	Target: 1 gallon per person/pet per day minimum for a 14-day shelter window.
[ ] FOOD	Shelf-stable canned proteins, grains, freeze-dried storage buckets, manual heavy can openers.	Target: 2,000 calories per person per day minimum for a 30-day window.
[ ] LIGHT	Heavy LED base camp lanterns, dedicated headlamps, massive replacement cell sets.	Keep 1 primary light immediately beside every sleeping mattress slot.
[ ] THERMAL	Heavy sub-zero sleeping bags, thick wool blankets, cold-weather base layers, hand warmers.	Plan to isolate family to one small room to conserve body heat during grid failure.
[ ] FIRST AID	Comprehensive household trauma case, daily prescription reserves, splints, burn gels.	Maintain a minimum 30-day buffer of all life-essential daily medications.

2. SUSTAINMENT MODULES & HAND TOOLS

Small infrastructure failures escalate rapidly when public utilities fail. Store these mechanical assets directly beside your main supply cache to protect your property perimeters.

KIT COMPONENT	REQUIRED INFRASTRUCTURE SPECIFICATION	VERIFICATION CHECK
Sanitation Cache	Heavy 55-gallon trash liners, 5-gallon utility buckets, snap-on toilet seats, bulk disinfectant liquid, heavy nitrile gloves.	[ ] Trash bags on hand [ ] Waste buckets sealed [ ] Chlorine powder stocked
Mechanical Tools	Adjustable crescent wrenches, heavy pliers, crowbar, multi-bit screwdrivers, manual hand saws, heavy claw hammer.	[ ] Shut-off wrench present [ ] Hardware bin locked [ ] Work gloves paired
Structural Repair	Heavy plastic sheeting rolls (mil spec), multiple heavy rolls of duct tape, multi-size wood screws, structural staple guns.	[ ] Tarp material measured [ ] Tape adhesive checked [ ] Hand tools dry/oiled
Fire Mitigation	ABC-rated dry chemical fire extinguishers (minimum 5lb capacity), heavy fire blankets staged directly near cooking areas.	[ ] Pressure gauges green [ ] Seals intact and checked [ ] Exit paths clear

3. STORAGE LOGISTICS & INVENTORY TRACKING

STORAGE SECTOR LOCATION	INVENTORY COUNT / TOTALS	NEXT SCHEDULED REVIEW DATE
Primary Cache Spot: _____	Water Volume: _____ Gallons	Review Date: _____
Secondary Cache Spot: _____	Caloric Reserve: _____ Days	Review Date: _____
Tool Locker Spot: _____	Battery Cells Counted: [ ] YES	Review Date: _____

4. ACTION PLAN & VERIFICATION

Turn these material requirements into concrete household actions. Stage your supply procurement phases systematically based on your physical space limits and budget parameters.

PRIORITY	ACQUISITION OR TESTING TASK	TARGET DATE	OWNER
1	Fill primary water containment drums; label with the exact storage date.	_____	_____
2	Procure non-electric manual can openers and secure to food storage crates.	_____	_____
3	Inspect all fire extinguisher pressure gauges; verify seals are fully green.	_____	_____
4	Match replacement cell battery sets to flashlights; seal in waterproof bags.	_____	_____
5	Log local emergency management non-emergency telephone lines below.	_____	_____
