**TL-08**

# NAVIGATION / MAP TOOLS

**A printable household worksheet for localized land navigation and grid mapping prior to grid disruption.**

**THE BASELINE RULE FOR BACKUP NAVIGATION**

Digital mapping networks, cellular positioning loops, and satellite tracking features fail entirely when power or communication grids collapse. A physical paper map and a baseplate compass provide an absolute operational backup. Complete this mapping registry with a pencil on a clear day while coordinates are fully retrievable.

## 1. HOUSEHOLD POSITION & DATUM LOG

Record your local coordinates exactly. Fill out these lines using clean block lettering.

**Primary Household Site Name:** _____

**Exact Latitude Coordinate (N):** _____ | Longitude Coordinate (W): _____

**Grid Zone Designation (UTM):** _____ | Estimated Elevation: _____ feet

**Primary Local Map Atlas Name:** _____

**Map Scale Ratio (e.g., 1:24,000):** _____ | Map Publication Date: _____

**Local Magnetic Declination Offset:** _____ | [ ] East [ ] West (Check appropriate box)

**North Adjacent Quadrangle Name:** _____

**South Adjacent Quadrangle Name:** _____

**■ CRITICAL AREA BENCHMARK REGISTRY**

[ ] PRIMARY RALLY INTERSECTION: Identify the closest crossroad outside your immediate property line. Note location: _____

[ ] HIGH GROUND POSITION: Identify the highest structural or natural elevation within a 3-mile radius. Note location: _____

[ ] CIVIL REFUGE ZONE: Identify the closest municipal public shelter or government staging building. Note location: _____

[ ] PERMANENT WATER LANDMARK: Identify the closest natural flowing water source (river, major creek, or reservoir). Note location: _____

## 2. ANALOG COMPASS MOVEMENT & ROUTE LEG MATRIX

Use this tracking block to map your route leg-by-leg. Ensure every coordinate is manually populated prior to departure. Keep your compass completely flat and clear of metallic or electronic items during readings.

| LEG NO. | MAGNETIC BEARING | ESTIMATED DISTANCE | DESIGNATED CHECKPOINT | IDENTIFIED HAZARDS |
|---|---|---|---|---|
| 01 | _____ ° | _____ miles | _____ | _____ |
| 02 | _____ ° | _____ miles | _____ | _____ |
| 03 | _____ ° | _____ miles | _____ | _____ |
| 04 | _____ ° | _____ miles | _____ | _____ |
| 05 | _____ ° | _____ miles | _____ | _____ |
| 06 | _____ ° | _____ miles | _____ | _____ |
| 07 | _____ ° | _____ miles | _____ | _____ |

## ■ ABSOLUTE FIELD NAVIGATION RULES

■ **THE S.T.O.P. DISORIENTATION PROTOCOL:** If your landmark updates do not match your map path, halt movement immediately. Never continue moving forward simply to feel like progress is occurring. Stop, trace back your time log to your last confirmed checkpoint, verify your bearing, and retrace steps only when safe.

■ **MAGNETIC INTERFERENCE ISOLATION:** Keep your compass a minimum of 1 foot clear of mobile smartphones, flashlights, or knives, and 15 feet clear of large car bodies or active electrical generators during all grid readings to ensure the needle handles correctly.

■ **TRAPPED WATER CONSERVATION:** If standard routes are physically blocked by flash floods, structural damage, or civil lines, do not force an unverified water crossing. Halt, seek immediate structural shelter, and track alternate paths from high ground.

## 3. SYSTEM MAINTENANCE LOG & RECURRING DRILLS

Regularly audit your physical navigation assets. Ensure paper documents are stored flat inside airtight waterproof cases and are free from rot or creases.

| AUDIT / REFRESH TARGET | COMPLETED DATE | INSPECTOR | MAINTENANCE ACTIONS EXECUTED |
|---|---|---|---|
| MAP VERSION VERIFICATION | _____ | _____ | _____ |
| COMPASS CASING AUDIT | _____ | _____ | _____ |
| LEG SIMULATION DRILL | _____ | _____ | _____ |

**CRITICAL LIFE SAFETY REGULATION AND AUTHORITATIVE REFERENCE REGISTER**

**LEGAL AND COMPLIANCE DISCLAIMER NOTICE:** THIS WORKSHEET IS AN INDEPENDENT RESILIENCE PLANNING AID AND TACTICAL FIELD LOG BLUEPRINT, NOT A SUBSTITUTE FOR ACCREDITED MAP READING INTERPRETATION, CERTIFIED WILDERNESS NAVIGATION INSTRUCTION, LOCAL INFRASTRUCTURE CODE RULES, OR OFFICIAL EMERGENCY-SERVICE EMERGENCY BROADCASTS. TOPOGRAPHIC MAP DATA CHANGES, ROUTING CHANNELS SHIFT, AND EMERGENCY COORDINATES VARY ROUTINELY WITHOUT REVISION UPDATES. IN THE EVENT OF DISORIENTATION, ENVIRONMENTAL THREATS, OR LIFE SAFETY EMERGENCIES, USER IS ORDERED TO IMMEDIATELY CEASE UNVERIFIED TRAVEL AND COMPLY WITH RECOVERY COMMAND INTERVENTIONS DETERMINED BY COMPETENT EMERGENCY AUTHORITIES, INCLUDING THE UNITED STATES GEOLOGICAL SURVEY (USGS), THE FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA), THE CENTERS FOR DISEASE CONTROL AND PREVENTION (CDC), THE NATIONAL PARK SERVICE (NPS), STATE CIVIL PROTECTION COUNCILS, OR COUNTY SEARCH AND RESCUE COMMAND UNITS.

**FIELD SOURCES AND AUTHORITATIVE RECOGNIZED REFRESH TARGETS:**
- United States Geological Survey (USGS) / The National Map - Topographic Grid Management Standards
- Federal Emergency Management Agency (FEMA) / Ready.gov - Emergency Relocation Planning Maps Guidance
- National Park Service (NPS) / Wilderness Center - Land Compass Bearing and Azimuth Tracking Frameworks
