

LOGICAL DIAGRAM. NOT TO SCALE.

OUT-OF-BAND MANAGEMENT // SCALE: NONE

REVISIONS

REV	DATE	DESCRIPTION	BY	APPR
C	05 FEB 2018	Management network separated per site.	EV	DC
B	29 AUG 2011	Modems removed. Cellular backup path.		
A	12 JAN 2004	Initial issue. Console servers, separate management switches, dial-in modem pool.		

NOTES

1. Management network physically separate from the production network (NET-001). Address range 172.16.0.0/16.
2. Console server in every row; serial console of every host, switch and router.
3. Cellular router for access when the production network is down. Modems removed.
4. Each site has its own management router and switches; no shared management path between sites.
5. Access from the management stations in the engineering room only.
